The following is an examiner's statement of reasons for allowance: The examiner retracts the inoperability rejection. It was mistakenly assumed that carbon dioxide was used as the mobile phase in the comparative example

The fact that none of the references use the combination of derivatised polysaccharide as the stationary phase and carbon dioxide as the mobile phase for isolation of delta-9-trans-tetrahydrocannabinol in preparative amounts renders the instant process unobvious.

Coke et al, Backstrom et al and Later et al are all drawn to tetrahydrocannabinol detection techniques and not preparative techniques.

Webster et al, as applicants state in their response, discloses carbon dioxide extraction of cannabinoids from hemp using either a solvent or a supercritical fluid followed by a chromatographic step. It does not disclose use of a chromatographic column in the extraction step.

Applicants' description of Webster et al, i.e. US Patent 6,403,126, in the specification at the par. starting at p. 1, line 34 was in error as to the above point. It has been corrected by applicants in said response.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bernard Dentz whose telephone number is 571-272-0683. The examiner can normally be reached on Mon.-Fri. 8AM-4:30PM.
